DORVAL CONVICTIONS

PROSPECTUS

UCITS governed by Directive 2009/65/EC

Management Company approved by the AMF (French Financial Markets Authority) under number GP 93-08 – SA with capital of **€303,025** - RCS Paris B 391 392 768

1, rue de Gramont, 75002 Paris, France – Tel.: +33 (0)1 44 69 90 44 – Fax : +33 (0)1 42 94 18 37 – Website: www.dorval-am.com

DORVAL
ASSET MANAGEMENT
FLEXIBLE PAR CONVICTION

I. GENERAL CHARACTERISTICS

1. Form of the UCITS

Mutual Fund (FCP)

2. Name

Dorval Convictions

3. Legal form and Member State in which the UCITS was established

French Mutual Fund (FCP) governed by European Directive 2009/65/EC.

4. Inception date and expected term

The Fund was approved on 27 December 2007 by the French Financial Markets Authority, *Autorité des Marchés Financiers*. It was created on 31 December 2007 for a term of 99 years (ninety-nine years).

5. Fund overview

Units	Features					
	ISIN code	Distribution of income	Base currency	Target subscribers	Minimum subscription amount	Minimum subsequent subscription
R (C) unit	FR0010557967	Accumulation	EUR	All subscribers	One thousandth of a unit	In thousandths of a unit
I (C) unit	FR0010565457	Accumulation	EUR	Strictly reserved for institutional investors or eligible counterparties defined by the Management Company	EUR 500,000	In thousandths of a unit
M (C) unit	FR0013192838	Accumulation	EUR	Reserved for feeder UCIs managed by the management company or another Group company	One ten-thousandth of a unit	In thousandths of a unit
N (C) unit	FR0013299187	Accumulation	EUR	Subscriptions of this unit are reserved for investors subscribing via distributors or intermediaries: <ul style="list-style-type: none"> • Subject to national legislation prohibiting any retrocessions to distributors (e.g. in the United Kingdom and the Netherlands) Or <ul style="list-style-type: none"> • Providing an independent advisory service: <ul style="list-style-type: none"> • within the meaning of the European MiFID II regulation • Individual portfolio management services under mandate 	One thousandth of a unit	In thousandths of a unit
Q (C) unit	FR0013392222	Accumulation	EUR	Reserved for Dorval AM funds or Dorval AM employees	One thousandth of a unit	In thousandths of a unit

6. Address from which the Fund's regulations, the latest annual and interim reports and asset composition can be obtained:

The latest annual report and interim reports, the Fund regulations and the breakdown of the assets will be sent to unitholders within eight working days of receipt of a written request to:

Dorval Asset Management

1, rue de Gramont, 75002 Paris, France

Tel.: +33 (0) 1 44 69 90 44

Fax: +33 (0) 1 42 94 18 37

Email: Informations@dorval-am.com

The Prospectus and the KIID (Key Investor Information Document) are also available on the website: www.dorval-am.com.

II. PARTIES INVOLVED

1. Management Company

Dorval Asset Management, a public limited company (société anonyme), 1 rue de Gramont, 75002 PARIS, France, approved by the AMF on 14 June 1993 under the number 93-08.

2. Depositaries and custodians

The depositary is CACEIS Bank, a public limited company, postal address, 1-3 Place Valhubert, 75013 PARIS, France, and a credit institution approved by the CECEI, the French Credit Institutions and Investment Firms Committee, on 1 April 2005.

The duties of the depositary include, as set out in the applicable Regulations, custody of the assets, checking that the Management Company's decisions are lawful, and monitoring the UCI's cash flows.

The depositary is independent of the Management Company.

The description of the delegated custodial duties, the list of custodians and sub-custodians of CACEIS Bank and information relating to conflicts of interest that may result from these delegations are available on the CACEIS website: www.caceis.com.

Updated information is available to investors upon request.

Control and management of conflicts of interest: Potential conflicts of interest may be identified, particularly in the event that the Management Company has business relations with Caceis Bank other than those arising from the depositary function. In order to manage these situations, the Management Company has set up and regularly updates a conflict of interest management policy designed to prevent the conflicts of interest that may arise from these commercial relations. The

aim of this policy is to identify and analyse potential conflict of interest situations, and to manage and monitor these situations.

3. Statutory auditor

KPMG Audit, 2, Avenue Gambetta, CS 60055, 92066 Paris La Défense, France.

4. Marketing agents

Dorval Asset Management, a public limited company, 1, rue de Gramont, 75002 Paris, France.

Natixis Investment Managers, a public limited company, 43 avenue Pierre Mendès France, 75013 Paris, France.

The Fund's units are listed on Euroclear. Accordingly, some marketing agents may not be appointed by or known to the Management Company.

5. Party responsible for accounting

CACEIS Fund Administration, a public limited company, 1-3, Place Valhubert, 75013 PARIS, France.

The main duties of the party responsible for accounting is to provide, in France and abroad, services to support the management of financial assets, in particular the valuation and administrative and accounting management of the financial portfolios.

As such, Caceis Fund Administration has been appointed by the Management Company as delegated administrative and accounting manager for the valuation and accounting of the Fund. Caceis Fund Administration is responsible for valuing the assets, establishing the net asset value of the Fund and the periodic reports.

The Management Company has not identified any conflicts of interest that may arise from such arrangements.

6. Clearing house

CACEIS Bank, a public limited company, 1-3, Place Valhubert, 75013 PARIS, France.

The depository is also responsible, on behalf of the Management Company, for the UCITS' liability accounting, which includes centralising subscription and redemption orders for units or shares, and managing the Fund's unit issue accounts.

III. OPERATING AND MANAGEMENT PROCEDURES

1. General features

a. Characteristics of units

ISIN code:

R unit: FR0010557967

I unit: FR0010565457

M unit: FR0013192838

N unit: FR0013299187

Q unit: FR0013392222

b. Rights associated with the share class

Rights attached to the unit class: each unitholder has co-ownership rights to the Fund's assets, proportional to the number of units held.

c. Liability accounting

Liability accounting is provided by the depositary, CACEIS Bank. The units are administered by Euroclear France.

d. Voting rights

As this is a mutual investment fund, no voting rights are attached to the units; decisions are taken by the Management Company.

e. Type of unit

Units are issued to unitholders.

f. Possible fractions of units

Subscriptions and redemptions are permitted from the first thousandth of a unit.

g. Financial year-end

The financial year ends on the day of the last net asset value of the month of December.

h. Information on the taxation system

The Fund, by its nature, is not subject to taxation. However, unitholders may be taxed on any income distributed by the Fund or when they sell Fund units. The tax regime applicable to amounts distributed by the Fund or unrealised or realised capital gains or losses will depend on the

individual unitholder's tax situation, residence for tax purposes and/or the investment jurisdiction of the Fund.

Any investor who has questions about his or her tax situation should consult a financial advisor or a professional investment consultant.

Some income distributed by the Fund to unitholders residing outside France may be subject to withholding tax in France.

2. Specific provisions

a. ISIN code

R unit:	FR0010557967
I unit:	FR0010565457
M unit:	FR0013192838
N unit:	FR0013299187
Q unit:	FR0013392222

b. Management objective

The management objective is to outperform the benchmark index (50% represented by the EONIA Capitalization Index 7 D (Bloomberg code OISEONIA) and 50% represented by the EUROSTOXX 50 NR (EUR) index calculated with net dividends reinvested) (Bloomberg code SX5T)) – and used solely for comparison and for calculating the performance fee that might be deducted – over an investment period of no less than three years, via a flexible allocation between equity and interest rate markets and with an environmental, social, and governance (ESG) opportunities/risks approach. The Fund is managed on a fully discretionary basis.

This product promotes environmental or social characteristics but does not have as its objective a sustainable investment. It might invest partially in assets that have a sustainable objective, for instance qualified as sustainable according to the EU classification.

c. Benchmark

50% EONIA Capitalization Index 7 D (Bloomberg code OISEONIA) and 50% Euro Stoxx 50 NR (EUR) index (Bloomberg code SX5T), calculated with net dividends reinvested (from 1 January 2013).

- Reminder regarding these benchmarks:
 - EONIA (Euro Overnight Index Average) Capitalization Index 7 D (Bloomberg code OISEONIA), rate calculated daily by the ECB resulting from the weighted average of overnight transactions made between the most active banks in the eurozone. It represents the eurozone risk-free rate. The EONIA index is calculated and published by the European Money Markets Institute on its website: www.emmi-benchmarks.eu.

- Euro Stoxx 50 NR (EUR): index containing the 50 stocks that are most representative of listings in the eurozone, including some of the largest market capitalisations. It is calculated with net dividends reinvested. (Bloomberg code: SX5T Index). The index is calculated by Stoxx and is available on its website: www.stoxx.com.

Investors' attention is drawn to the fact that the composition of the portfolio may differ significantly from that of its benchmark index.

- The administrators of the indexes are the European Central Bank and Stoxx Ltd. The indexes are available on the following sites:
 - <https://www.euribor-rates.eu/eonia.asp>
 - <https://www.stoxx.com/>
- The European Money Market Institute is listed in the benchmarks register maintained by the ESMA (regulatory authority: Financial Services and Markets Authority (FSMA) – BEFS) and Stoxx Ltd (regulatory authority: Federal Financial Supervisory Authority (BaFin) – DEBA).

The reference benchmark as defined in the Regulation 2019/2088 (article 2(22)) does not intend to be consistent with the environmental or social characteristics promoted by the fund.

d. Investment strategy

▪ Strategies used

The Fund is based on an active and unconstrained management, framed by the Management Company's socially responsible investment (SRI) policy. The Fund benefits from the SRI label.

The initial investment universe is made up of French and foreign diversified securities.

The construction and management of the portfolio combine a financial and non-financial approach and are based on:

1. A determination of the rate of exposure to French and European equities
2. An identification of investment themes considered to be promising, i.e. in line with major trends (macro-economic, societal and sustainable development challenges), as well as with the economic situation (valuation of asset classes, market dynamics and sectoral context).
3. A selection of securities within these investment themes, supplemented by securities selected for their own interest; in both cases and a fortiori for the second, the securities held in the portfolio meet the criteria defined by the Management Company, shown below
4. An allocation of these securities in the portfolio, based on a proprietary rating methodology established using these same criteria, also described below

An analysis of the sector and geographical balance, or even the orientation of the “management styles” of the Fund's investments is carried out, without however supervising the construction of the portfolio. The balance of the portfolio is invested in money market and interest rate products in order to secure capital and reduce the overall volatility of the portfolio.

It is recalled that the specific management of the bond market and credit market sub-funds is not the purpose of the management objective.

Rating of securities combines three analyses, each based on a set of criteria:

1. A financial analysis
2. A non-financial analysis
3. An analysis of the “managers/companies” partnership

Each analysis is reviewed at least annually and is updated as necessary based on information and/or events relating to the life of the companies held in the portfolio.

The overall rating resulting from these three analyses is used to select securities and their weighting in the Fund's portfolio.

- The financial analysis

In financial terms, the managers focus their investments on securities whose market price does not, in their view, reflect the growth prospects and true value of the company. As a result, the securities selection methodology is based on a qualitative and quantitative analysis of past and prospective financial elements, based on the estimates of the management teams using the "GARP" ("growth at reasonable price") approach.

The main criteria taken into account in the financial analysis are (examples):

- Earnings growth
- “Price Earnings to Growth”, i.e. the PER of the equity security in relation to expected earnings growth
- The enterprise value in relation to its earnings before interest and taxes (EBIT) and/or its earnings before interest, taxes, depreciation and amortisation (EBITDA)

On the basis of these criteria, a financial rating is assigned to each security, which allows their relative appreciation within the portfolio. This rating is one of the components of the final rating of each security held by the Fund.

- The non-financial analysis

Environmental, social and governance (ESG) criteria are directly integrated into the Fund's management process through an ESG rating for each security in the investment universe. The ESG rating provides the definition of the eligible investment universe and also serves as a second component of the overall rating of securities in the construction/management phase of the portfolio.

To carry out these two steps, management teams and financial and non-financial analysts establish an ESG rating for each security. The ESG rating assigned to each issuer takes into account

the challenges that appear to be most significant for the Management Company from among more than 30 ESG challenges, based on a set of qualitative and quantitative indicators. Each challenge is reviewed according to the particularities of the sector, geography and size of capitalisation. The main challenges at stake are (non-exhaustive):

- Environmental challenges:
 - Carbon emissions
 - Waste treatment
 - Water stress
 - Biodiversity and land management
 - Opportunities in green technologies and renewable energies
- Social challenges:
 - Work management
 - Employee safety management
 - Human capital management
 - Protection of personal data
 - Product quality
- Governance challenges:
 - Compliance with the basic principles of corporate governance (quality of the Board of Directors – diversity, independence, skills, representation –, alignment of interests with shareholders, capital structure, respect for minority shareholders, quality of financial reporting and accounting)
 - Anti-corruption efforts

The adopted approach is “Best-In-Universe”, which consists in favouring companies with the best ratings from a non-financial point of view, irrespective of their industry. Since sectors that are generally considered to be the most virtuous will be more represented, this approach may create assumed sectoral biases.

Our methodology is partly based on basic data from an external provider. Our methodology places Governance at the heart of ESG analysis, and can therefore minimise certain environmental or social risks/opportunities.

The Fund's ESG analysis covers at least 90% of the portion of the net assets made up of securities eligible for our SRI analysis (equity and debt securities issued by private and public issuers).

The definition of the investment universe of eligible securities is based on compliance with the following non-financial key principles:

- Exclusion of companies that violate Dorval Asset Management's exclusion policy¹
- The exclusion of companies with controversial practices (including non-compliance with the UN Global Compact principles) in line with Dorval Asset Management's controversy management policy²

¹ Dorval Asset Management's Exclusion Policy can be found at:
https://www.dorval-am.com/sites/dorval/files/exclusion_policy_202010_0.pdf

² Dorval Asset Management's Controversy Management Policy can be found at:
https://www.dorval-am.com/sites/dorval/files/controversy_management_policy_202010_0.pdf

- The exclusion of 20% of the investment universe is guaranteed by the exclusion of the lowest rated companies and those with an eliminatory rating on at least one of the pillars (see below) of the internal methodology developed by Dorval Asset Management

The non-financial rating (between 0 and 10, 10 being the best rating) is established on each of the three pillars, E, S and G. Issuers with an environmental or social rating of less than 1 or a governance rating of less than 2 are excluded, as are all issuers with an overall non-financial rating of less than 4.

The selection of public issuers is based on internal methodology developed by Dorval Asset Management for sovereign issues³. Countries in the lowest ranking quintile are excluded from the initial investment universe.

The 10% of assets (excluding cash) that may not be subject to SRI analysis correspond, on the one hand, to UCIs managed by entities other than Dorval Asset Management and for which there may be a disparity in the ESG/ISR approaches assumed and, on the other hand, to transitorily unrated securities. The Fund may indeed invest in issuers that could, on a temporary basis, not be rated, in particular in the context of an IPO.

- Analysis of the “managers/companies” partnership

Lastly, the selection of securities in the portfolio is based on an analysis of the qualitative and quantitative criteria relating to the manager, the management team and the governance bodies. The Management Company has defined four main manager profiles: “the successors”, “the fly-ins”, “the builders”, and “the heirs”:

- “Successors”: these executives started their career in the company they manage today. In most cases, they have more than 10 years’ experience in the company in a management position in an international context
- “Fly-ins”: they were given authority during a crisis; these managers are the heads of a pool of companies in turnaround situations
- “Builders”: genuine niche developers, they have the ability to identify one or several long-term growth opportunities;
- “Heirs”: they have a family link with the Builder and take on the operational management of the company. They often start out with a poor image which is not always justified and are often assisted in their initiatives by an experienced manager

The assessment method for executives is based on the analysis of their professional experience, their managerial profile and through regular direct contact. The managers assess the executives using five criteria that measure their intrinsic qualities as well as their ability to deliver a growth surplus over time. The criteria are based on two concepts: qualities of a “developer” and qualities of a “manager”.

³ See section “VI. Taking on board ESG dimensions” of Dorval Asset Management’s SRI policy (https://www.dorval-am.com/sites/dorval/files/responsible_investment_policy_20201109_0.pdf)

The list of assessment criteria according to the “developer” and “manager” type is show below:

Qualities of a “Developer”	Qualities of a “Manager”
Business skills/experience and contact network/knowledge of the competitive environment	Charisma/ability to gain support from others/track record
	Ability to deliver/margin culture
Control of growth	Participation in the capital/convergence of interests

The “Managers” rating is the third component of the final rating of each security held by the Fund.

▪ Description of the assets used:

The target allocation is 50% equities and 50% interest rate products, but this may vary according to market conditions and the opportunities that may present themselves to the manager.

• Equities or equity securities:

Between 0 and 100% of the Fund’s assets may be exposed to equity markets.

Characteristics of the shares or equity securities held:

- Securities traded on regulated markets.
- Shares issued almost exclusively by European companies.
- Equities of non-European companies and companies from emerging countries in Eastern Europe, Latin America and Asia will be held on an ancillary basis and will not represent more than 10% of the total assets.
- Up to 40% of the total assets will be held in equities of companies listed in a currency other than the euro.
- Equities from all economic sectors.
- Equities of small, medium or large-caps.
- Equities purchased by the Fund that are not expressly part of the benchmark index.

• Debt securities and money-market instruments:

Between 0 and 100% of the Fund’s assets may be invested in interest rate markets.

Characteristics of interest rate products held:

- Negotiable debt securities or bonds;
- The Fund may hold convertible bonds.

Securities with an Investment Grade rating (BBB-) as a minimum. The Management Company relies on its teams and its own methodology to appraise credit risk. The securities comprising the portfolio must satisfy rating constraints as described below: Standard & Poor’s rating or equivalent.

The modified duration range of the securities held will be between 0 and 6.

Investors are reminded that the specific management of sub-funds in the bond and credit markets is not the ultimate purpose of the management objective, and that the interest rate product portion is held to limit overall portfolio volatility.

- Shares or units of other UCIs:
The Fund may hold units or shares in UCIs (UCITS or AIFs) or investment funds, subject to a limit of 10% of its assets:

UCITS under French law*	X
UCITS under European law*	X
Retail investment fund under French law*	X
Professional investment funds under French law in compliance with the common law governing cash borrowings (not over 10%), counterparty risk, overall risk (not over 100%) and limiting at 100% the re-use of collateral*	
AIFs under European law or investment funds under foreign law that are the subject of a bilateral agreement between the AMF and the fund's oversight authority and if information exchange arrangements have been set up reporting the management of assets on behalf of third parties*	
Collective investments under French law or AIFs under European law or investment funds under foreign law satisfying the conditions in Article R 214-13 of the French Monetary and Financial Code*	
Investment funds under European or foreign law satisfying the criteria in the General Regulations of the French Financial Markets Authority (Article 412-2-2 of the AMF General Regulations)	
Feeder UCITS or AIF	
Funds of Funds (UCITS or AIF) under French or European law holding more than 10% in UCIs	
Professional investment funds not satisfying the common law criteria above	
Professional specialised investment funds	
Capital investment funds (including risk funds, managed futures funds, private investment funds) and professional capital investment funds	
Real estate funds (OPCI, OPPCI) and similar structures under equivalent foreign law	
Alternative funds of funds	

* These UCITS/AIFs/Funds may not themselves hold more than 10% of their assets in UCITS/AIFs/Funds.

The UCIs and funds held by the Fund may be managed by Dorval Asset Management or one of the management companies of the BPCE Group. In the latter case there could be a disparity in the ESG/RSI approaches assumed.

- Financial derivative instruments:
Based on the managers' expectations of the direction of the equity markets, in order to leverage or protect performance, the Fund may use futures or options traded on organised or regulated markets. The Fund does not seek to overexpose itself.
The Fund will not use total return swaps.

Type of instruments used	MARKET TYPE			RISK TYPE					OPERATION TYPE

- Deposits:**
These transactions may be used within the limits set out in the regulations to earn interest on cash according to their levels of remuneration in comparison to other money market products.

- **Cash borrowings:**
Cash borrowings may not represent more than 10% of the assets and serve, occasionally, to ensure liquidity for holders wishing to redeem their units without penalising the overall management of assets.
- **Temporary purchase and sale of securities:**
None.
- **Contracts amounting to collateral:**
None.
- **Leverage:**
The Fund does not use leverage.

e. Risk profile

Your money will be mainly invested in financial instruments selected by the Management Company. The Mutual Investment Fund's risk profile is compatible with an investment horizon of more than three years. These instruments will be subject to the trends and fluctuations of the financial markets of the eurozone.

The risks to which unitholders are exposed through the Fund are primarily as follows:

- **Discretionary management risk**
Discretionary management is based on anticipating trends in the financial markets. The Fund's performance will depend on the companies selected and the asset allocation defined by the Management Company. There is a risk that the Management Company may not select the best-performing companies.
- **Capital risk**
The portfolio is managed on a discretionary basis, and does not benefit from any guarantee or protection for the capital invested. A capital loss occurs when a unit is sold at a price that is lower than its purchase price.
- **Equity risk**
The Fund's net asset value may vary upward or downward given that a large proportion of the portfolio is invested in equity markets. Due to its management strategy, the Fund is exposed in particular to small- and mid-cap companies which, as a result of their specific characteristics, may have a liquidity risk due to the potentially illiquid nature of their market and fall further than large-caps in periods of stress.
- **Risk related to capitalisation size**
The Fund may be exposed to one or more small and mid-cap equity markets. The volume of these securities listed on the stock market is low, so market fluctuations are therefore more pronounced than with large-capitalisation companies. The Fund's net asset value may therefore be impacted.

- **Market risk**
The Fund's net asset value may experience volatility caused by the investment of a large portion of the portfolio in the equity markets.
- **Currency risk**
The exchange rate risk is related to exposure, via investments and by trades in futures and options, in a currency other than that of the Fund's valuation. Currency fluctuations with respect to the euro may have a positive or negative effect on the Fund's net asset value.
Unitholders residing in the eurozone may have to bear this currency risk, subject to a limit of 40% of the portfolio.
- **Interest rate risk**
Interest rate risk results in a decrease in the net asset value in the event of changes in interest rates. When the sensitivity of the portfolio is positive, an increase in interest rates may lead to a fall in the value of the portfolio. When the sensitivity is negative, a fall in interest rates may lead to a fall in the value of the portfolio.
- **Credit risk**
Credit risk is the risk that an issuer cannot meet its commitments. In the event of a deterioration in the quality of the issuers, such as their rating by the financial rating agencies, the value of the bonds may fall and cause the Fund's net asset value to fall.
- **Risk of investing in emerging markets**
The Fund may invest up to 10% of its assets in equities from emerging countries in Eastern Europe, Latin America and Asia. Investors are reminded that operating and supervisory conditions in some of the above markets may fall short of the standards prevailing on major international stock markets.
- **Sustainability risk**
This product is subject to sustainability risks as defined in the Regulation 2019/2088 (article 2(22)) by environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. Portfolio investment process includes the above-mentioned ESG approach to integrate sustainability risks into the investment decision or process. The sustainability risk management policy is available on the website of the Management Company.

f. Target subscribers and typical investor profile

The units of this Fund have not been registered under the US Securities Act of 1933. Therefore, they may not be offered or sold, directly or indirectly, for the profit of or on behalf of a "US Person", as defined in the US "Regulation S". Furthermore, the units of this Fund may also not be offered or sold, directly or indirectly, to "US persons" and/or to any entity held by one or more "US persons" as defined by the US Foreign Accounting Tax Compliance Act (FATCA).

Apart from this exception, the units of the Fund are defined as:

- R units: All subscribers.
- I units: Strictly reserved for institutional investors or eligible counterparties defined by the Management Company.
- M units: Reserved for feeder UCIs managed by the Management Company or another Group company.
- N units: Reserved for investors subscribing via distributors or intermediaries:
 - Subject to national legislation prohibiting all retrocessions to distributors (e.g. in the United Kingdom and the Netherlands)
 - or
 - Providing:
 - an independent advisory service as defined by the European MiFID II regulation
 - individual portfolio management services under mandate
- Q units: Reserved for Dorval Asset Management funds or Dorval Asset Management employees.

This Fund is intended for investors seeking capital growth by means of a vehicle invested flexibly in equities and interest rate products, with the goal of outperforming the benchmark index over a minimum period of 3 years.

The appropriate amount to invest in this Fund depends on each investor's personal situation. To determine this amount, investors should take into account their personal assets, their current and future financial needs over the recommended investment period, and the extent to which they are prepared to take risks.

Investors are strongly advised to seek professional advice in order to diversify their investments and determine the proportion of their financial portfolio or assets to be invested in this Fund. Investors are also advised to diversify their investments sufficiently to avoid being exposed exclusively to the risks of one Fund.

g. Recommended minimum investment period

Over 3 years.

h. Determination and allocation of revenues

The net income for the financial year is equal to the amount of interest, arrears, dividends, premiums and share-outs, directors' fees and all income generated by the securities held in the portfolio of the Fund, plus income generated by temporary cash holdings, less management fees and borrowing costs.

Distributable income corresponds to the net income for the financial year plus retained earnings, plus or minus the balance of any accrued income or deferred expenses for the financial year ended.

Distributable sums are fully accumulated each year, with the exception of those subject by law to compulsory distribution.

- R units: Accumulation
- I units: Accumulation
- M units: Accumulation
- N units: Accumulation
- Q units: Accumulation

i. Characteristics of units

Initial net asset value:

- R units: EUR 100
- I units: EUR 1000
- M units: EUR 100
- N units: EUR 100
- Q units: EUR 100

Units are denominated in euros. They may be decimalised in thousandths of a unit.

Minimum initial subscription:

- R units: one thousandth of a unit
- I units: EUR 500,000
- M units: one ten-thousandth of a unit
- N units: one thousandth of a unit
- Q units: one thousandth of a unit

Minimum subsequent subscription amount: one thousandth of a unit

j. Subscription and redemption procedures

Orders are executed in accordance with the table below:

D	D	D: NAV calculation day	D+1 business day	D+2 business days	D+2 business days
Centralisation of subscription orders before 1:00 p.m. ¹	Centralisation of redemption orders before 1:00 p.m. ¹	Execution of the order on D at the latest	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions

¹ Unless a specific deadline has been agreed with your financial institution.

Investors are reminded that, when sending instructions to marketing agents other than the organisations indicated above, they must take into account that the cut-off time for clearing imposed by CACEIS Bank applies to these marketing agents. As a result, these marketing agents may apply their own cut-off time, which may precede the cut-off time mentioned above, in order to take into account their order transmission deadline with CACEIS Bank.

k. Date and frequency of net asset value calculation

The net asset value is calculated every day except for public holidays in France, even if the Paris stock market is open. In this case, as well as in the event that the Paris stock market is closed, it is calculated on the next working day.

It is calculated based on the last known net asset values for UCIs and, for other securities, based on the last price listed.

It may be obtained from the Management Company and the depositary on the next working day after the day on which the NAV is established.

I. Fees and commissions

- Subscription and redemption fees:

Subscription and redemption fees increase the subscription price paid by the investor or reduce the redemption price. The fees charged by the UCITS serve to offset the charges it incurs when investing and divesting investors' assets. Remaining fees are paid back to the Management Company.

Fees charged to the investor, payable at the time of subscription or redemption	Base	R Units Rate Scale	I Units Rate Scale	M Units Rate Scale	N Units Rate Scale	Q Units Rate Scale
Subscription fee not retained by the UCITS	Net asset value x Number of units	2% (max.) incl. tax	2% (max.) incl. tax	2% (max.) incl. tax	2% (max.) incl. tax	5% (max.) incl. tax
Subscription fee retained by the UCITS	Net asset value x Number of units	Zero	Zero	Zero	Zero	Zero
Redemption fee not retained by the UCITS	Net Asset Value x Number of Units Number of Units	Zero	Zero	Zero	Zero	Zero
Redemption fee retained by the UCITS	Net asset value x Number of units	Zero	Zero	Zero	Zero	Zero

▪ Operating and management fees

These fees cover all the charges invoiced directly to the UCITS, excluding transaction charges. Transaction charges include intermediary fees (e.g. brokerage fees, stock market taxes, etc.) and the transaction fee, if any, that may be charged, particularly by the Custodian and the Management Company.

The following may be charged in addition to the operating and management fees:

- Performance fees. These reward the Management Company if the Fund exceeds its objectives. They are therefore charged to the UCITS;
- Transaction fees charged to the UCITS.

Fees charged to the UCITS	Base	Rate scale R unit	Rate scale I unit	Rate scale M unit	Rate scale N unit	Rate scale Q unit
Financial management fees and administrative charges external to the Management Company	Net assets	1.60% (max.) incl. tax	0.80% (max.) incl. tax	0.10% (max.) incl. tax	1.30% (max.) incl. tax	0.10% (max.) incl. tax
Outperformance fee	Net assets	20% of the positive outperformance above the performance of its benchmark index, when it is established(1)	20% of the positive outperformance above the performance of its benchmark index, when it is established(1)	None	20% of the positive outperformance above the performance of its benchmark index, when it is established(1)	None
Transaction fee accruing to the custodian	Deducted from each transaction or operation			From €5 to €59 excluding tax depending on the type of instrument and the stock exchange		
Transaction fee accruing to the Management Company				Maximum 0.35% incl. tax		

(1) The performance fee applicable to a particular unit class is based on a comparison of the Fund's valued assets and its reference assets.

The Fund's valued assets are the portion of the assets corresponding to a specific unit class, valued in accordance with the valuation rules applicable to the assets and taking into account the actual operating and management fees corresponding to this unit class.

The reference assets represent the portion of the Fund's assets corresponding to a specific unit class, adjusted to take into account the subscription/redemption amounts applicable to this unit class at each valuation, and, if need be, valued in accordance with the outperformance of the selected benchmark.

The benchmark index used to calculate the performance fee is the following composite index: 50% Euro Stoxx 50 NR (EUR) calculated with net dividends reinvested (Bloomberg code: SX5T Index) +

50% Eonia Capitalization Index 7D (Bloomberg code: OISEONIA Index), at the closing price. It is denominated in euros.

The observation period corresponds:

- To the observation period, for R, I, N units: from 1 January to 31 December of each year.
- If, during the observation period, the Fund's valued assets are strictly greater than the reference assets as defined above and if its performance is therefore positive, the variable portion of the management fees will amount to 20% inclusive of tax of the difference between these two assets.
- If, during the observation period, the Fund's valued assets are less than or equal to the reference assets, the variable portion of the management fees will be zero.
- If, during the observation period, the Fund's valued assets are strictly greater than the reference assets and if its performance is therefore positive, this difference will be subject to a provision for variable management fees at the time of the net asset value calculation.
- In the event that the Fund's valued assets are less than or equal to the reference assets between two net asset values, any previously approved provision will be reduced accordingly. Reductions in provisions must not exceed the previous allocations.

This variable portion will only be collected at the end of the accounting period if, over the elapsed period, the Fund's valued assets are greater than the reference assets at the time of the final net asset value for the reference period.

In the event of redemption, the portion of the provision corresponding to the number of shares redeemed is permanently retained by the Management Company.

Investors are invited to refer to the UCITS' annual report for further information.

- Method for calculating and distributing fees for temporary purchases and sales of securities
The remuneration received, where applicable, from temporary purchases and sales of securities and from any equivalent transaction under foreign law is paid to the UCITS in full.
- Commission in kind
Dorval Asset Management does not collect, either on its own behalf or on behalf of third parties, any commission in kind as defined in the AMF General Regulations. Investors are invited to refer to the Fund's annual report for further information.
- Selection of intermediaries
We have a rigorous selection process for brokers and financial intermediaries. They are selected from among reputable financial intermediaries on the basis of multiple criteria related to the provision of research services (fundamental financial analysis, company information, value added by partners, solid basis for recommendations, etc.) or execution services (access to market information, transaction costs, execution prices, good transaction settlement practices, etc.). Investors are invited to refer to the Fund's annual report for further information. The financial intermediary selection procedure is available on Dorval Asset Management's website, at http://www.dorval-am.com/fr_FR/informations-reglementaires.

IV. COMMERCIAL INFORMATION

- Circulation of Fund information:

The latest annual report and the composition of assets will be sent to unitholders within eight business days of receipt of a written request addressed to: Dorval Asset Management, 1, rue de Gramont, 75002 PARIS, France.

The information relating to environmental, social and governance (ESG) criteria taken into account by the Management Company for its range of funds is available on the website www.dorval-am.com, and is included in the annual report of funds that take these criteria into account.

The AMF's website www.amf-france.org contains additional information on the list of regulatory documents and all the provisions relating to investor protection.

All subscription and redemption requests relating to the Fund are centralised by the depositary under the authority of the Management Company: CACEIS Bank, a public limited company, 1-3, Place Valhubert, 75013 PARIS, France.

- Prospectus publication date: 10 March 2021

V. INVESTMENT RULES

The Fund is subject to the legal investment rules applicable to UCITS governed by European Directive 2009/65/EC investing up to 10% of their assets in units or shares of UCITS.

VI. OVERALL RISK

The overall risk ratio of this UCITS is determined using the commitment method.

VII. ASSET VALUATION AND ACCOUNTING RULES

- REVENUE RECOGNITION:
The Fund records its revenue using the coupon received method.
- RECOGNITION OF INVESTMENTS AND DIVESTMENTS IN THE PORTFOLIO:
Investments and divestments in the Fund's portfolio are recognised excluding trading fees.

▪ VALUATION METHODS:

At each valuation, the Fund's assets are valued using the following principles:

- Equities, bonds and equivalent listed securities (French and foreign securities):
They are assessed at their stock market price. The stock market price used depends on the market where the security is listed:
 - European listing markets: last market price of the day;
 - Asian listing markets: last market price of the day;
 - Australian listing markets: last market price of the day;
 - North American listing markets: last market price of the previous day;
 - South American listing markets: last market price of the previous day.In the event that a security is not listed at approximately 2.00 p.m., the final stock market price of the previous day is used.
- UCITS securities in the portfolio:
Valuation is based on the last known net asset value.
- Temporary purchases of securities:
 - Repos at purchase: contractual valuation.
 - Reverse repos at purchase: contractual valuation, as the seller's redemption of the securities is forecast with sufficient certainty.
 - Securities lending: valuation of securities lent at the stock market price of the underlying asset. Securities are recovered by the UCITS at the end of the loan agreement.
- Temporary sales of securities:
Securities given under reverse repurchase agreements: Securities given under reverse repurchase are valued at market price, the debt representing the securities transferred under reverse repurchase agreements is maintained at the value set in the contract.
- Unlisted securities:
Valuation using methods based on asset value and yield, taking into account the prices used for recent significant transactions.
- Tradable debt securities:
 - Negotiable debt securities with a residual maturity of less than three months at the time of acquisition, are valued on a straight-line basis
 - Negotiable debt securities acquired with a residual maturity of more than three months are valued:
 - At market value up to three months and one day prior to maturity
 - The difference between the market value recorded three months and one day prior to maturity and the redemption value is calculated on a straight-line basis over the last three months.

- Rule concerning the market value selected:
 - Securities with a maturity ranging between three months and one year:
 - For negotiable debt securities traded in large volumes: an actuarial method is applied and the rate of return used is that recorded every day on the market.
 - Other negotiable debt securities: a proportional method is applied and the rate of return used is the EURIBOR rate for an equivalent term, adjusted, where applicable, by a margin representing the intrinsic characteristics of the issuer.
 - Securities with a maturity exceeding one year: an actuarial method is applied.
 - For negotiable debt securities traded in large volumes, the rate of return used is that recorded every day on the market.
 - Other negotiable debt securities: application of a yield curve possibly corrected by a margin calculated according to the characteristics of the security (of the issuer).
- Futures and options transactions:
 - Futures contracts:

Futures contracts are valued at their market value.

Market prices used to value futures contracts are in line with those of their underlying securities. They vary depending on the market where the contracts are listed.

 - Futures contracts listed on European markets: daily net asset value clearing rate.
 - Futures contracts listed on Asian Markets: daily clearing price of the net asset value
 - Futures contracts listed on Australian Markets: daily clearing price of the net asset value
 - Futures contracts listed on North American markets: the previous day's settlement price
 - Futures contracts listed on South American Markets: daily clearing price of the net asset value
 - Options:

The options in the portfolio are valued:

 - At their clearing price
 - Or, failing that, at the closing price
 - The closing prices are those of the day of the net asset value or, if they are unavailable, those of the previous day.
 - Swaps:
 - Swaps with a maturity of less than three months are not valued.
 - Swaps with a maturity exceeding three months are valued at market price.
 - When the swap contract is backed by clearly identified securities (quality and maturity), these two elements are stated.
- Forward currency contracts:

These are hedging transactions on securities in the portfolio denominated in a currency other than that of the Fund's accounting currency, by means of a foreign currency loan in the same

currency and for the same amount. Currency futures are valued according to the yield curve for lenders/borrowers of the currency.

- Off-balance sheet valuation method:
 - Futures contracts are appraised at market value. It is equal to the price (or the estimate, if the transaction is carried out over the counter) multiplied by the number of contracts, multiplied by the par value.
 - Options transactions are appraised at market value, which involves translating the option into its underlying equivalent. This translation consists of multiplying the number of options by a delta. The delta is calculated using a mathematical model (Black-Scholes model) with the following parameters: the price of the underlying option, the time to maturity, the short-term interest rate, the exercise price of the option and the volatility of the underlying option.
 - Dividend swaps against changes in performance are shown at nominal value plus the valuation difference at the end of the financial year.
 - Asset-backed or non-asset-backed swaps are recorded off balance sheet:
 - For swaps with a maturity of less than three months: at nominal value, plus or minus the interest differential
 - For swaps with a maturity exceeding three months:
 - Fixed rate/floating rate: valuation of the fixed-rate leg at market price.
 - Floating rate/fixed rate: valuation of the floating-rate leg at market price.

VIII. REMUNERATION

Details of the Management Company's remuneration policy are available at www.dorval-am.com.
