

Key investor information

This document provides you with key investor information about this UCITS. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this UCITS. You are advised to read it so you can make an informed decision about whether to invest.

DORVAL MANAGEURS EUROPE

ISIN code: FR0011038785 R (C) EUR unit

Management Company: Dorval Asset Management (BPCE Group)

OBJECTIVES AND INVESTMENT POLICY

- Over a recommended minimum investment period of five years, the Fund seeks to outperform its benchmark, the MSCI PAN EURO NR, calculated with net dividends reinvested, by using an approach based on the opportunities and risks inherent in environmental, social and governance (ESG) policies to invest in European Union securities, in line with the Management Company's Socially Responsible Investment (SRI) policy.
- The Sub-Fund is actively managed. The Benchmark is used for comparison purposes only. The Delegated Investment Manager remains free to choose the stocks that make up the portfolio in accordance with the Sub-Fund's investment policy.
- The Benchmark can be used to determine the performance fee that will possibly be levied.
- The initial investment universe is determined in accordance with the criteria applicable to the French equity savings plan (PEA), i.e. it is primarily comprised of securities of European Union companies, irrespective of their size. It complies with the investment ratio of 75% in securities eligible for the PEA.
The portfolio's construction and management is based on: (a) identifying investment themes that are regarded as high-growth, (b) selecting securities from within these investment themes, supplemented by securities selected on their own merits and (c) allocating these securities within the portfolio, using a proprietary methodology that combines three analyses and three ratings:
(1) qualitative and quantitative financial analysis of past financial data and forecasts, based on the managers' estimates using the "GARP" ("growth at a reasonable price") approach. (2) non-financial analysis that focuses on the ESG issues that the Management Company considers to be the most significant (including carbon emissions, waste management, human resources management, protection of personal data, quality of the board of directors, protection of minority interests, anti-corruption). The "Best-in-Universe" approach is used. Our methodology is based in part on basic data from an external provider. It puts Governance at the heart of the ESG analysis and may focus less on some environmental or social risks/opportunities. (3) analysis of executives and companies in tandem, using qualitative and quantitative criteria that measure the ability of the management team and governance bodies to deliver long-term additional growth based on two concepts: "developer" qualities and "manager" qualities.
The synthetic rating that results from these three analyses facilitates the selection of securities and their weighting within the Fund's portfolio. Each analysis is reviewed at least once per year and updated in real time. The sectoral and geographical balance of the Fund's investments, or even the type of management style used, is analysed, although this does not regulate the construction of the portfolio.
The AMF classification of this UCITS is: European Union equities.
- At least 60% of the Fund's assets are exposed to European Union equity securities and a maximum of 10% of its holdings are invested in UCIs.
Its allocation is spread over investments:
 - In equity securities of companies from European Union countries, representing between 75% and 130% of the Fund's assets.
 - In money market instruments and debt securities, representing up to 25% of the Fund's assets. Selected issuers are rated at least BBB by Standard & Poor's or equivalent. The Management Company uses its own teams and its own methodology to assess credit risk.
- The Fund may use derivatives traded on regulated or organised markets for exposure or hedging purposes. The Fund may overexpose itself, subject to a limit of 130%.
- The UCITS accumulates its income.
- Redemption requests are received every day by 1.00 pm at the latest and are executed daily.

RISK AND REWARD PROFILE

The benchmark index reflects the Fund's high exposure to European Union equity markets through discretionary management.

- The historical data used to calculate the level of risk may not provide a reliable indication of the UCITS' future risk profile.
- The lowest category does not mean "risk-free" investment.
- The risk category associated with this UCITS is not guaranteed and may change over time.

Major risks for the UCITS that are not taken into account in the benchmark:

- Credit risk:** credit risk arises from the risk of a deterioration in the quality of an issuer and/or an issue, which may result in a decrease in the value of the security. It may also arise if an issuer included in the portfolio defaults on repayment at maturity.
- Liquidity risk:** liquidity risk represents the price reduction that the UCITS might potentially have to accept in order to sell certain assets for which there is insufficient market demand.
- Impact of management techniques, particularly Forward Financial Instruments:** the risk related to management techniques is the risk of increased losses caused by the use of forward financial instruments such as derivatives, futures or options.

CHARGES

The charges and fees you pay are used to cover the running costs of the UCITS, including the costs of marketing and distributing units. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	2.00%
Exit charges	None

The percentage indicated is the maximum that might be taken out of your money before it is invested.

In certain cases, investors may pay less.

Investors can obtain the actual amount of the entry and exit charges from their advisor or distributor.

Charges deducted by the UCITS over the previous financial year

Ongoing charges	2.40%
-----------------	-------

Performance-related charges deducted by the UCITS

Performance fee	In the event of positive performance, 20% of the UCITS' outperformance of the benchmark index, the MSCI Pan Europe, i.e. 0.01% for the previous financial year.
-----------------	---

The ongoing charges are based on figures from the previous financial year, ended December 2020. This figure may vary from one financial year to the next.

The ongoing charges do not include:

- performance fees.
- Intermediary charges, except in the case of entry and/or exit charges paid by the UCITS when it buys or sells units in another collective investment scheme.

For more information on charges, investors are advised to refer to the "Charges" section of the prospectus for this UCITS, available online at www.dorval-am.com.

PAST PERFORMANCE

- The performance graph shown here does not constitute a reliable indication of future performance.
- Annual performance is calculated following the deduction of charges from the UCITS.
- **UCITS launch year:** 2011.
- **Year the R (C) EUR unit was created:** 2011.
- **Currency:** Euro.
- The performance of the UCITS is not linked to the performance of the benchmark. The benchmark is to be used as a comparator.

PRACTICAL INFORMATION

- Depository: CACEIS Bank.
- The prospectus, annual reports and latest periodic documents, as well as all other practical information for the UCITS, may be obtained from the Management Company on written request to: DORVAL ASSET MANAGEMENT, 1 rue de Gramont, 75002 Paris, France, or to the following email address: informations@dorval-am.com.
- Information about other unit classes is available in the same manner.
